Ganesh Ramchandran has served as a Senior Adjunct Lecturer at the NUS Business School, where he taught a second-year graduate course on Risk Management and guest lectures at various CAMRI-based portfolio management classes within the Student Managed Fund Track. Ganesh has close to 25 years of experience in the financial markets across New York, London and Singapore with a background in quantitative trading and risk management, as well as a strong interest in academics. He is currently Managing Director of a consulting firm in risk management and education that he launched in mid-2014. Previously, Ganesh was responsible for structured funding trades /investments in Asia Treasury for Barclays. In an earlier role, he priced and hedged Barclays' counterparty exposure from derivative transactions in Asia. He has also advised start-up firms/hedge funds in statistical arbitrage, distressed credit and global macro.

In London, Ganesh was a Senior Portfolio Manager at the hedge fund CQS where he headed structured credit trading and specialised in credit volatility/correlation. Previously, he was a senior proprietary trader at DrKW in exotic credit and also head of risk management of credit products for the firm. Ganesh earlier worked at CSFB where he covered European interest rates and volatility strategies for the bank's leveraged clients and was part of the team that helped unwind Long Term Capital Management's swap portfolio following the hedge fund's collapse in 1998.

In New York, Ganesh was at Goldman Sachs, where he was part of the Fixed Income Research group that helped develop the Black-Litterman Global Asset Allocation model, and worked directly with Fischer Black in marketing the model to asset manager/pension fund clients. Ganesh began his career at the Federal Reserve Bank of New York as an Assistant Economist. He holds a BA (Phi Beta Kappa) in Economics and Mathematics, and an MSc in Operations Research, both from Columbia University.
